DR. T. B. CARR, recently from New York, has opened an office on Market street, next door to Drs. Mearfs & Anderson.

In addition to a full assortment of the best incorruptible mineral teeth, he has the exclusive right to use in this town. Dr. John Allen's Patent improvement, by which the teeth are united to the plate, with one continuous, mineral gum. This has endured, without the slightest change, the severest test, and is pronounced by competent judges the greatest improvement in the Dental Art, that has been made in years. Specimens of the new kind of plate teeth, together with numerous testimonials may be seen at his office.

Reference given to individuals in this place, now wearing teeth with this improvement.

The valuable Medicines above named have recently been introduced, with the approval of a number of the Medical Profession in the City of Baltimore and elsewhere, and in practice have succeeded most admirably in curing the dieases for which they are prescribed. They are offered to the Country Practitioner, as medicines which he can in all respects depend upon, as prepared in agreement with the experience of some of the most learned and judicious Physicians, and strictly in conformity with the rules of Pharmacry, as especially serving his convenience, who cannot so readily as the City Physician have his own prescriptions compounded by a practical Pharmacentist.

See the descriptive Pamphlets, to be had gratis of all who have the Medicines for sale, containing recommendation from Doctors Martin, Baltzell, Addison, Payne, Handy, Love, &c.

Doct. S. B. Martin, says "I do not hesitate to recommend your Diarrhæa Cordial and Anodyne Cherry Expectorant," &c.

Doct. John Addison, says "It gives me much pleasure to add my testimony to that of others, in favor of the extraordinary efficacy of your Diarrhæa Cor- isl," &c.; and of the Expectorant, "I have no hesitation in recommending it, as a most valuable medicine," &c.

Doct. L. D. Handy, writes, "I have administered your Anodyne Expectorant, in several cases of Bronchial affection, with the most happy resul s, and from a knowledge of its admirable effects, can with the greatest confidence recommend it," &c.

Doct. W. S. Love, writes to us that he has administered the Expectorant to his wife, who has had the Bronchitis for for fourteen years, and that she is fast recovering from her long standing malady. It has in a few week done her more good than all the remedies she has heretofore used under able medical counsel.

Bixteen of the best Apothecaries and Pharmaccutists in the City of Baltimore, write "We are satisfied the preparations known as Stabler's Anodyne Cherry Expectorant and Stabler's Diarrhæa Cordial are medicines of great value and very efficient for the relief and curs of the diseases for which they are recommended, they bear the evidence of skill and care in their preparation and style of putting up,, and we take pleasure in recommending them."

Mesers. A G. Brace & Co.—I had a valuable horse that about three weeks since was wounded severely in his thigh, with a sharp heok, opening a gash three inches in length and an inch or more deep. I tried various articles to heal it, but infarmation getting into it caused large quantities of saster to collect, and the limb was quite stiff. A friend of mine seked me if I had tried the Mustang Liniment to which I replied in the negative, but thinking it might Jo some good, was induced to try it. I had only used one half bottle when the infarmation began to be removed.

Married, on the 10th ult., in Kennebunkport, Me., by Rev. C. W. Heywood, Miss Amands Mann to Mr. A. R. Nott, all of Kennebunkport. The following poetical correspondence is said to have actually passed between the above named couple, and to have been the bona fide "proposal."—The fact that they were known to be inveterate punsters makes the statement more probable. The last stanza, we presume, was added by our correspondent:—[Bost. Post.

Oh, that I could prevail, my fair,
That we unite our lot! Oh, take a man, Amanda Mann, And tie a "double knot." Your coldness drives me to despair— What shall I de? ah what?

For you I'm growing thin and spare—
For you I'm a "pine Nott." If I should hear that you had died 'Twould kill me on the spot— Yet only yesterday, I cried
"Ah! would that she were Nott!"

The "chords" and tendrils of my heart Around thee fondly "twine"— Amanda! heal this athing smart! Amanda, oh be mine! These very terms, as I opine,
Suggest united lots—
Let's tie then, those "cords" and twine"
In hymeheal knots.

> Miss Amanda Mann's Reply. This life, we know, is but a span, Hence I have been afraid That I should still remain A. Mann, And die at last-a maid.

And often to myself I say On looking round, I find There's Note, a man in every way Just suited to my mind. I fain would whisper him apart,

He'd make me blest for life—
If he would take me to his heart
And make A Mann a wife. Love not, my mother often says, And so too says the song— I'll heed the hint in future days, And love Nott well and long. Then oh! let Hymen on the spot, And bind me in a lashing knot Tied with a single beau!

And now I give myself to you, Then tie those "cords and twine" into A dozen little Notts. Amateur Fowl Breeder The Editor of the Lynn Bay State has been buying

The following incident occured some years ago on board the flag ship of our squadron lying at Rio. The accouchment of the Empress was hourly expected; and an officer had been sent on board of all the men of war in the harbor, requesting them to salute, as soon as the event was announced by signal from the tower. Day after day passed away. The quartermaster constantly on the poop with glass in hand watching for "the signal," and the gunner

equally on the alert, to be ready to discharge his duties. Expectation had so long been on tiptoe, that at last we became careless, and the event was announced to us by the banging of guns from the ships around. before the signal had been seen by any one of our look-outs. Here we were in a pretty pickle; fairly caught napping. The guns not primed and nothing ready. Great was the excitement, the gunner was blown up by the first lieutenant, and he in his turn venting the indignation upon the bloody lubber of a quartermaster. The lieutenant singing out "Why don't you fire ?" and the gunner replying "I am priming the guns."

Finally the lieutenant ordering the firing to commence, Starboard-fire! Port-fire Starboard-fire! Port-fire! away they went with most beautiful precision until six were discharged, when there was a dead pause. "Why don't you go on?" screamed the lieutenant; " not primed," said the gunner. At last off went another and after a longer interval another. like angels' visits, few and far between. The lieulenant was almost speechless with vexation. The Commodore now came from the cabin and inquired the cause of the interruptions to the salute. This capped the climax of the poor lieutenant's perplexity.-Nearly frantic with excitement, he rushed up to the nearest gun and applying his mouth to the vent, he screamed into the gun at the top of his voice. " Fire! fire! fire! consarn you, why don't you fire!"

Louis Napoleon is evidently very much annoyed with the reception of the King of Belgium at Vienna, and the attention paid to him by the sovereign of Austria and Prussia. Thousands in England remember the day when Prince Leopard of Saxe-Cobourg became the centre of attraction as the young gentleman who was on a matrimonial visit to England. He married the heiress of the British Crown, and within a year afterwards lost both wife and child. He was offered the crown of Greece, which he refused; but when offered that of Belgi um he accepted it. He married the accomplished and amiable daughter of Louis Phillippe, and has again been left a widower. He has now govern Belgium wisely and successfully during twenty-three years of great political commotion and great breaking up of old dynasties and establishment of new rare chickens, and which he was very cautious in setting under his best hen. The Vanderbilt Steam Yacht North Star.

Southampton, Thursday.—The American steam yacht North Star came into the tidal basin of the Southampton docks last evening, and to-day has been the object of general attention. Her appearance, construction, and equipment present so many novel and curious features to English naval men, that many opinions have been expressed as to her therits. Most of the old-fangled notions of builders of English ocean steamers are completely discarded in the North Star and although it may be questionable whether the adoption of so much of the principle of the American lake and river boats into the uses of transatlantic steamships as in the case of the North Star is in the long run desirable; yet it is certain that this beautiful ship is in the highest degree worthy of attention, and that many points, particularly those in reference to her model and water-lines, are eminently calculated to convey useful hints to builders and steamship owners on this side, who have been so repeatedly and thoroughly beaten in the great race of steam navigation going on between the British and American steamships. The external appearance of the North Star, from the absence of bowsprit and figurehead, and the abrupt termination of the bow of the ship, which is quite perpendicular, is different from that of any of the English steamers, and is certainly foreign to the ordinarily received views of ship shape appearance on this side of the water. Her model is, however, the perfection of nautical beauty, and gives promise of the highest speed at the least expenditure of motive power. The public are freely admitted on board, and the ship is exhibited by the officers with the greatest courtesy. The fittings of the cabin are the especial theme of admiration of most of the visiters, and it is difficult to belive that any royal or imperial yacht could be sup plied with greater luxuries or conveniences, or greater taste and elegance.

With regard to the machinery, although its excellence in a mechanical point of view, is admitted by engi-Shormaking—The Eastern papers state that a machine has been invented, but not yet patented, which will do the entire pegging of a shoe, with either one, two, or three rows of pegs, in from two to three minutes. The number of rows make no difference in the time, and the work is pronounced far better than hand work can be. A further novelty in the case is, that this machine makes its own pegs as it does its work, the English marine engineers seem hardly disposed to the commend the adoption of the principle, foreseeing that much danger of damage and derangement is hazzlarded by having so much top-hamper on deck in heavy weather. The rigging of the ship is very slight, and comes hardly under the denomination of "jury rig," the Americana in all cases trusting to the machine recommend. neers, yet, as it sets aside all preconceived notions thus destroying the value of that ingenious machine the Americans in all cases trusting to the machiner for making pegs that has so long been both useful and as the sole propelling power, and using sails merel for the purpose of steadying the ship in a seaway.

For Congress,

HON. WM. S. ASHE. Magnaulmity.

There are few indications of discomfiture so strik ing and unmistakeable as a resort to personality or abuse -- especially in the case of a gentleman aspiring to a seat in the Congress of the United States, and upon whose lips professions of a desire to conduct the canvass in a high and honorable manner are ever present, and lugged in at all sorts of times. Since Mr. Leak has been out, we have treated him with marked courtesy-more, indeed, than his subsequent conduct shows that he deserved. It is true, we have, as we have felt bound to do, exposed the demagogueism of his appeals, and the unsoundness of his issues. As conductors of a Democratic Journal, we could not be expected to do less, and that we have done so to some purpose, is shown by Mr. Leak's personal attack upon us at Long Creek. The galled jade winces, and will yet wince more. But to the matter in hand :

We understand that Mr. Leak, in his speech at Long Creek on Saturday last, made a marked display of that liberality of feeling and generosity of disposition which so eminently characterize him. Being a very poor man, as everybody knows he is he took occasion to complain bitterly that the Journal had charged him for his advertisement announcing himself as a candidate, and perhaps also for his hand-bills, making his appointments. We would venture to assure Mr. Leak that we charge all alike whose announcements we advertise, and that we intend to do so. We see no earthly reason why Mr. Leak should expect us to make his business known to the public for nothing, any more than anybody else, or than the other candidates for office, -all o whom expect to pay us, and to do so cheerfully. We conduct our business in our own way. We ask n favors, and we grant none. The nearest and dear est must part, and although we regret the necessity that compelled us to separate Mr. Leak from his beloved three dollars and a half, yet do we most sincerely hope that he will recover from the shock. and that the loss of the three cart-wheels and a half (for such, and so large they, no doubt, appeared in his eyes) may not prove fatal to his nervous sys-

Age. no doubt, has its privileges, and dotage its excuses but neither can cover premeditated littleness, or render bigotry and intolerance respectable. The time has not yet come when the mere place of his birth can be attributed to any man as a crime; nor even require excuse as a misfortune. As men. and as citizens, all must be measured by the standard which their own actions have established; and so they will be measured by every being possessing one particle of soul, or one spark of republican feeling-whether Mr. Leak's course entitles him to lay claim to either of these, we leave the public to judge. Convinced we are, that two certain " foreigners," namely, the present Elitor of the Journal and his late brother, the former Editor, have done more for the Democratic cause, and sought less for themselves than Mr. Leak has ever done in the long years during which he claims to have been a member of the party. When have we asked anything from the party save their good will and confidence? When has Mr. Leak not asked? And, in heaven's name, what has he done? or when has he ever even appeared to do anything, without having something in view for himself? Let Mr. Leak talk about these matters again as often as he pleases. His course is nearly run. We are sorry that time, which should have tempered passionate and malicious feelings, has not made him more of a Christian and of a good manmore of a Democrat and of a liberal politician.

Perhaps we should have expected all this. It is a safe maxim to be surprised at nothing, and hereafter we shall be surprised at nothing from this source pected better things, and even now we cannot afford ture, so as to include such pettinesses or the authors of them. They are exceptional cases which no anticipations of well-meaning man can reach; and no language of a respectable journal characterize. Important Railroad Decision.

The Supreme Court of Missouri have just made decision involving a large amount of subscriptions of scription of the stock to this road, the Legislature made was one repealing the section which fixed the Western terminus of the road in Cass county, and, in effect, been located to Kansas. Other changes were made, them from their liability under the general law for double the amount of stock subscribed.

A vote of the stockholders was had on the adoption of the amendments to the charter, a majority in numoption of the amendments, they refused to pay the instalments on their stock, on the ground that the charter having been changed without their consent, they were released from their subscriptions. The railroad company brought suit to recover the instalments that had fallen due, and the decision now made settles the for the revolutionary din of propagandism. It has point in controversy.

A writer for the New York Times, speaking of the plans of various cities, says that "New York, the great commercial metropolis, seems never to have had the benefit of any planning at all." We don't believe this. Such outrageously crooked streets could not have been laid out accidentally or at random. It must have required a great deal of planning to get up so ugly a town. (BY REQUEST.) the Liberia Harald, Nov. 6th, 1851. BASSA COVE, Oct. 14th, 1851.

My DEAR Sin : It was over two months after the date of the redemption of your profiles (as contained in the last number of the August Herald), to give me your views in reference to foreigners being permitted to possess interest in the cultivation of lands Liberia, that it came to hand. I have unavoidably suffered more than a month to close (owing to the pressure of business) before responding to your riews either pro or con. For which I need make no urther apology, nor even for a dissent from your jews, (should this be the case.) because we are not trangers, and are wont to allow such poor privileges in correspondence, that would, perhaps, to othrs prove highly offensive.

As the word interest in your article, may be anlied in the premises either in a restricted, or more stended sense, - until you define the precise limition of your application of that word, I shall be at loss how to express myself, whether as agreeing with you, or dissenting.

If, sir, by foreigners, you restrict the term to white people, and by their possessing interest in the cultirations of lands in Liberia, you restrict that interest o the investment of capital in the cultivation of lands, exclusively owned by Liberians, (such Libeians as our present Constitution recognizes.) and with the exception of a refundment only through he medium of the products of the land they thus may be allowed to cultivate-an interest to this exient, though attended with some dangers as well as enefit in our infantile state. I have no inclination a oppose; perhaps I might measurably become its dvocate, until such arrangement began to wear a aspicious or undermining aspect. But, sir, if you mean that their interest shall com-

rehend the owning of as much as a square inch of iberian soil, either singly or jointly, to this I must incompromisingly object, and think that I will firmmaintain the same opinion for many years to me, perhaps to the close of my earthly career. I confess, that there is considerable plausibility in our remarks that the fearful apprehensions of mav of our fellow-citizens that their rights, &c. &c., will be liable to an abatement provided, which are permitted to reside in this country, "originates from he fact that nine tenths are from the south where they were accustomed to seeing money-power and intelligence on the side of the whites."

It is but reasonable to suppose that persons bred and born under such influences will be thus strongimpressed, (for it is an old and pretty well receivd saying, that a burned child dreads the fire,) and cordially agree with you—that such persons should t be ridiculed for entertaining such notions.

But sir, after all our speculations in the premises. must be confessed, that there is something serioustrue, in the fact, that knowledge is power,-and ealth is influence, and will always predominate ver their opposites. When I speak of knowledge will not consider me guilty of the current blasemy (in some countries) of ascribing intellectual periority to them! Evening Post : NEW YORK, June 14, 1853. To the Editors of the Evening Post :

Sirs: - A report has appeared in several papers that Amin Bey, who visited the United States a few months since as an agent of the Turkish Sultan, was an impostor. The following statement may place the matter in a better light. On my last voyage to the Med. iterranean I received a letter from the minister resident (Mr Marsh) at Constantinople, informing me that he had "applied to the Sublime Porte to send an eing power in reference to white men. I beg that agent of the Turkish government to the United States, for the purpose of visiting the docks, navy yards, and arsenals, and to gain other information in relation to this country; and that he (Mr. Marsh) had pledged the Turkish government a free passage for him, (Amin Bey,) and that if I refused him a passage it would place the legation in a very delicate position a refined manners and good sense of the age. Yet, He added "that Amin Bey, if sent, would meet me at Spezzia." to manhood; it has now a giant's strength. Whether it would have been possible to maintain the colonies in subjection to the Crown of England for a much longer period, may well be doubted .-Trade regulated at Westminister could hardly be consistent with wealth and freedom at New York. Sources of dispute might have arisen, even if the plan of Lord Rockingham, or that of Lord Chatham, had been fully adopted. But it was the peculiar infelicity of George III. and Lord North that they turned to gall all those feelings of filial piety which had so long filled the breasts of the Americans.

The Declaration of Independence has one singular defect in it, but which only proves the lingering affection which the Americans still retained for the mother country.

As Mr. Jefferson originally drew the Declaration of Independence, he charged the acts of which the Americans complained, in the first place to the King, but secondly to the people of Great Britain. Thus, he said of them, that "when occasions have been given them, by the regular course of their laws, of removing from their councils the disturbers of our harmony, they have, by their free election, re-established them in power." Then, again, he proposed to say. These facts having given the last stab to agonizing affection, and manly spirit bids us to renounce forever these unfeeling brethren. We must endeav-

For Congress, HON. WM. S. ASHE.

Some ITEMS WORTH LOOKING AT .- If people will only keep their eyes reasonably open they will always find some little circuumstances "sticking out" so to speak by which the sincerity of professions, no matter how high flowing, may be tested. So it is in the present canvass for Congress in this district. Every body who was present at the discussion between Messrs. Ashe and Leak at the Court House on Wednesday night last will recollect that Mr. Leak stated that this issue of his, in regard to the public lands, was no new thing with him; but that he had avowed the same opinions during his canvass for Governor in 1846. He also John Thompson-he (Thompson) lingering some stated emphatically, that so strongly did he feel upon three days. He is four feet high and should be a candidate for Governor; but in a letter to weighs one hundred and five pounds. His present Mr. Lander of Lincoln county, written in the spring of that year, Mr. Leak stated positively that if nominated he would not canvass. His zeal was not strong enough to induce him to undertake the labor or ex- little reason for doubting the old negro's age, of of France and England. he says: pense of a canvass then. Again, in 1852 Gov. Reid was re-nominated and accepted, and stood upon a platbeen known in Sampson for time immemorial alform the very opposite of the schemes proposed by Mr. Leak and his friends, vet Mr. Leak takes pride to himself for his services in favor of Gov. Reid's election this time last year, and still he says that this is no new-born zeal of his, but that he has held the views for years. If so why did he say nothing against Gov. Reid's platform, but on the contrary warmly support whole work will make near if not quite seven thouthat gentleman?

Again-it will be remembered how vehemently wide: and we learn that there is not a mistake in Mr. Leake talked about a private letter being alluded the whole work, which is done, notwithstanding adto by Mr. Ashe. That letter was in regard to an vancing age, in a neat, smooth and legible hand .appointment for office-so much appeared from Mr. While engaged with this, Mr. Vail has taken the Leake's own admission, and whether it was to be census of Sampson County once, and has attended considered as an application for office or not, is a o the duties of a small post office. matter we need not now discuss. The really important matter is Mr. Leake's admission, that if the ate, and we do think that our liberal friends of Sampconsulate, either to Havana or Liverpool had been son would be doing a just and generous action by votendered to him he would have accepted it. Where ting some extra compensation to Mr. Vail, as a token then would have been all this zeal? Actually of their appreciation of the excellent and faithful man- phorus, among which the fort of Roumilly. These facts which we have stated, or to which we have mortal offence. We have half a dozen communicamade allusions, are all admissions of Mr Leake's tions complaining of the author of a little article about own. Let us look a little farther, and perhaps we may, without traveling much out of our road, find other circumstances which will enable us still more fully to contrast practice and professions. We think it is hard ly necessary to remark, that Mr. Leak is a gentleman of wealth, and no doubt worthy of all the prosperity with which he has been blessed. That Mr. Ashe is not as rich as we think so clever a gentleman ought to be, is also, unfortunately, we believe, too true; he might, perhaps, have been a richer man if he had made fewer sacrifices for his party and his friends .-Of course, Mr. Ashe is a gentleman of too high spirit to make, or to eanction any appeals upon such a basis as this; and certainly we are not enough of demagogues to awaken prejudices for or against a man for his wealth or his poverty; but have made the reference for the purpose of illustrating a little trait of character. Mr. Leak admits, that if he, alreaby a wealthy man, had got one or the other of the two fattest offices in the gift of the government-he would have taken it, and "poor old North Carolina" might have whistled for him .-On the other hand, what was Mr. Ashe's course. At the seat of government-personally popular-an active and trusted politician-with a strong influence in the cabinet, little doubt can be entertained but that if he had sought a lucrative and honorable post he would have obtained it. But he did not even once entertain the idea. Prodigal of his courtesies and services to his friends, he was careless for himself. He felt a deep interest in certain projects for the benefit of the district. He believed and believes still that he can carry them through, and with that end in view he wished and wishes to go back to Washington, there to devote his energies in season and out of season for ports in the Black sea where Circassian and Georgian the furtherance of matters on which, as a Cape Fear man and a North Carolinian, his heart is set.

Now look at it. Mr. go; whereupon, the consul lowered his flag, and wrote Leak claims to be a Democrat, and seeks the support of Democrats. He knows as well as we that the body of the Democrats in this State are against him; he knows as well as we do that the Convention of the party assembled in Raleigh last summer, nominated Gov. Reid upon a platform directly opposed to Mr. Leak's hobby; and yet, knowing this and claiming Democratic support, Mr. Leak very modestly says to the party :- " Gentlemen, you must all turn around and take up my no- Hogs are exceedingly fond of it, and fatten on it ra- himself against being thus summarily disposed of ; tions.
